

DRAFT TANZANIA STANDARD

Laboratory glassware - One-mark volumetric flasks

For Stakeholders Comments Only

TANZANIA BUREAU OF STANDARDS

CDC 5 (1983) DTZS ISO 1042:1998 Laboratory glassware - One-mark volumetric flasks

National Foreword

Tanzania Bureau of Standards (TBS) is a sole National Standards body, established by the Standards Act No. 2 of 2009. It is mandated, among other functions, with formulation of National Standards in all products.

This Draft of Tanzania Standard is being prepared by Glass and Glass Products Technical Committee under the supervision of Chemical Divisional Standards Committee.

This Draft of Tanzania Standard is the identical of ISO 1042:1998 *Laboratory glassware - One-mark volumetric flasks* published by International Organization for Standardization (ISO).

The following translation proposed to Clause 3.1 (Note), 'Conférence Générale des Poids et Mesures' to read as 'General Conference on Weights and Measure'.

Terminology and conventions

The text of the international standard is hereby being recommended for approval without deviation for publication as draft Tanzania standard.

Some terminology and certain conventions are not identical with those used as Tanzania standard; attention is drawn especially to the following;

The coma (,) has been used as a decimal marker (.) for metric dimension. In Tanzania, its current practice to use a full point on the baseline as decimal marker.

Wherever the words "International Standard" appears in the text, referring to this standard, they should be read as "Tanzania Standard".

Scope

This International Standard specifies requirements for an internationally acceptable series of one-mark volumetric flasks, suitable for general laboratory purposes.
